

Nemesysco and Beijing Caifu Jiamei Technology Team Up to Promote Voice Analysis in China

Beijing Caifu Jiamei will resell Nemesysco's LVA technology based products and solutions in the Chinese market

Netanya, Israel – March 24, 2008 - Nemesysco Ltd., a leading provider of voice analysis technologies for the defense and civilian markets, announced that it has formed a partnership with Beijing Caifu Jiamei Technology, a leading distributor of investigative analysis software and forensic solutions in China.

This new collaboration will enable the distribution of Nemesysco's voice analysis solutions, including the LVA 6.50 Investigation Focus Tool, across the Chinese market. Nemesysco's LVA 6.50 is a non-invasive solution designed for truth verification and emotion detection by analyzing vocal parameters in real-time or from recorded material, during investigations, interviews and casual conversations.

"We are pleased to join forces with Nemesysco and are confident that the company's products will make a valuable contribution to our portfolio of investigative analysis and forensic software. Nemesysco's wide range of solutions will definitely have a very positive impact and a great contribution to the development of prosperous and harmonious society. Through our network of resellers across China, we plan to leverage our wide range of solutions to continue in the effort to prevent crime and fraud", said Bertil Von Buckel, CEO of Beijing Caifu Jiamei Technology.

"The partnership with Beijing Caifu Jiamei Technology will help us create a foothold in the Chinese market, and bring the power of our voice analysis solutions for the benefit of users across the nation. With products such as LVA 6.50 Investigation Focus Tool and LVA-i for Pre-Employment Screening, we hope to reach law enforcement agencies and commercial organizations in the Chinese market", commented Amir Liberman, CEO of Nemesysco.

About Nemesysco

Nemesysco Ltd. is a leading provider of voice analysis and emotion detection technologies, for defense and civilian markets. Nemesysco's LVA (Layered Voice Analysis) technology detects the emotional content of a conversation, in real-time or from recorded materials, enabling analysis of different types of stress, cognitive processes and various emotional reactions. Nemesysco's products are implemented in a wide variety of applications for law enforcement, homeland security, insurance and banks fraud prevention, employee screening, call center quality monitoring, healthcare and entertainment. Nemesysco is a privately held company, founded in 2000 and is headquartered in Netanya, Israel. For more information please visit www.nemesysco.com.
